CARL JOHN HARO

Full-Stack Developer | AI Developer

Iloilo City, Philippines | 0961-083-4292 | carljohnharo02@gmail.com | github.com/m3tamorphosis | carljohnharo.vercel.app

PROFESSIONAL SUMMARY

Full-stack developer building AI-powered web applications with React, Next.js, TypeScript, Node.js, PostgreSQL, and Supabase. Experienced in LLM integration, RAG pipelines, embeddings, authentication, and document processing for career management and data analysis tools. Professional front-end and game development background in reusable interfaces, animation systems, and mobile performance optimization with React, Phaser 3, and HTML5 Canvas/WebGL.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C#
AI / ML: RAG, Embeddings, OpenAI API, Groq API, LLM Integration, PDF Text Extraction
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Motion, Phaser 3 (Canvas/WebGL)
Backend: Node.js, REST APIs, API Integration, Prisma ORM, NextAuth.js, Xendit Payment Integration
Databases: PostgreSQL, MySQL, SQL Server, Supabase, Neon, Firebase
Tools: Git, GitHub, Vercel, VS Code, Figma, Power BI, Tableau, Vite, Playwright
AI Tools: GitHub Copilot, Claude AI, Codex, Gemini

EXPERIENCE

Front-End Web Developer — Mid | Game Development *April 2026 – October 2026*
HPL Game Design Corporation

- Built reusable UI components and animation systems with React, Vite, JavaScript, HTML5 Canvas, and CSS3, using Motion for physics-based animation and easing.
- Developed cross-platform Phaser 3 games for iOS and Android with reusable game loops, sprite animation, and win/lose state management.
- Implemented drag-and-drop, tap-to-play, and timed challenges tailored to iOS and Android devices.
- Optimized mobile builds to meet strict 5 MB delivery limits while preserving smooth animation.

Business Data Analytics Intern *Feb 2025 – May 2025*
Department of Budget and Management (DBM)

- Analyzed government financial datasets for budget monitoring and reporting
- Converted 100+ PDF financial reports (~10,000 records) into structured datasets for analytics use
- Built Power BI dashboards to track budget utilization KPIs

PROJECTS

Front-End & Game Dev — HPL Game Design Corporation *April 2026 – October 2026*

- Built reusable front-end templates with React, Vite, and HTML5 Canvas/WebGL for responsive, animated mobile experiences.
- Integrated Phaser 3 game mechanics and the MRAID SDK, delivering single-file HTML builds optimized within strict 5 MB limits.

Tech Stack: React, Vite, Phaser 3, Tailwind CSS, CSS3, Motion, HTML5 Canvas/WebGL, MRAID SDK

CareerForge AI — AI-Powered Career Management Web App (Live Demo) *Sep 2026 – Oct 2026*

- Built a career platform with Auth.js authentication, Prisma/PostgreSQL storage, Groq-powered resume rewriting and cover letters, plus application tracking.
- Implemented shared resume preview/PDF rendering, Free/Pro usage limits, and webhook-driven Xendit test-mode billing.

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Prisma, Auth.js (NextAuth.js), Groq API, Xendit, Playwright

InsightVault Lite — AI-Powered Data Analytics Web App (Live Demo) *Jan 2026 – Feb 2026*

- Built a multi-step CSV/PDF analysis pipeline with intent routing, paragraph-based chunking, embeddings, and metadata-filtered RAG for grounded responses.
- Added deterministic CSV charts, streamed answers, Supabase authentication, and optional Slack/email delivery.

Tech Stack: Next.js, React, TypeScript, PostgreSQL, Supabase, OpenAI API, Recharts, RAG, Embeddings

Danger Zone — Disaster Simulation Game (Thesis Project) (Live Demo) *2024 – 2025*

- Contributed to UI and layout design and integrated Unity with Firebase to support leaderboards for a team-developed disaster-response training game.

Tech Stack: Unity, C#, Firebase

EDUCATION

Bachelor of Science in Computer Science
Central Philippine University, Iloilo City, Philippines — 2021–2025
