CARL JOHN HARO

Full-Stack Developer | AI Developer

Iloilo City, Philippines | 0961-083-4292 | carljohnharo02@gmail.com | github.com/m3tamorphosis | carljohnharo.vercel.app

PROFESSIONAL SUMMARY

Full-stack developer building AI-powered web applications with React, Next.js, TypeScript, and Node.js, backed by PostgreSQL and Supabase. Hands-on with LLM integration, RAG pipelines, embeddings, and PDF processing, shipped in live tools for document analysis, data insights, and career management. Strong front-end and game development foundation: reusable UI components, animation systems, and interactive games built with Phaser 3 and HTML5 Canvas/WebGL.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C#

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Motion, Phaser 3 (Canvas/WebGL)

Backend: Node.js, REST APIs, API Integration, Prisma ORM, NextAuth.js, Xendit Payment Integration

Databases: PostgreSQL, MySQL, SQL Server, Supabase, Neon

AI / ML: RAG, Embeddings, OpenAI API, Groq API, Machine Learning, PDF Text Extraction

AI Tools: GitHub Copilot, Claude AI, Codex, Gemini

Tools: Git, GitHub, Vercel, VS Code, Figma, Power BI, Tableau, Vite, Playwright

EXPERIENCE

Front-End Web Developer — Mid | Game Development *April 2026 – October 2026*

HPL Game Design Corporation

- Engineered reusable animation systems and interactive UI components using React, Vite, JavaScript, HTML5 Canvas, and CSS3, including Motion-powered physics-based motion and easing curves tuned for smooth, consistent frame rates
- Built high-performance, cross-platform interactive game experiences for Android and iOS using Phaser 3 and HTML5 Canvas/WebGL, engineering reusable game engines with core game development principles — game loops, sprite-based animation, and win/lose state logic
- Designed interactive gameplay mechanics (drag-and-drop, tap-to-play, timed challenges) optimized for iOS and Android device specifications to maximize player engagement and retention
- Optimized front-end build bundles for mobile deployment, maintaining strict 5MB size limits while preserving smooth animation performance

Business Data Analytics Intern *Feb 2025 – May 2025*

Department of Budget and Management (DBM)

- Analyzed government financial datasets for budget monitoring and reporting
- Converted 100+ PDF financial reports (~10,000 records) into structured datasets for analytics use
- Built Power BI dashboards to track budget utilization KPIs

PROJECTS

Playable Content Development — Client Project — HPL Game Design Corporation *April 2026 – October 2026*

- Architected a reusable interactive template using React, Vite, and HTML5 Canvas/WebGL, bundled into a single-file HTML build via vite-plugin-singlefile for lightweight, dependency-free deployment
- Integrated MRAID SDK and Phaser 3-driven game mechanics — game loops, sprite-based animation, physics-based motion — into a single reusable, production-ready template

Tech Stack: React, Vite, Phaser 3, Tailwind CSS, CSS3, Motion, HTML5 Canvas/WebGL, MRAID SDK

CareerForge AI — AI-Powered Career Management Web App (Live Demo) *Sep 2026 – Oct 2026*

- Developing an AI-powered platform for resume building, bullet enhancement, tailored cover letter generation, and job application tracking

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Prisma, NextAuth.js, Groq API, Xendit

InsightVault Lite — AI-Powered Data Analytics Web App (Live Demo) *Jan 2026 – Feb 2026*

- Built an AI-powered analytics platform enabling natural-language queries over CSV and PDF datasets with interactive dashboards

Tech Stack: Next.js, React, TypeScript, PostgreSQL, Supabase, OpenAI API, Recharts

Danger Zone — Disaster Simulation Game (Thesis Project) (Live Demo) *2024 – 2025*

- Educational disaster-response simulation game built for Disaster Risk Reduction (DRR) training with interactive emergency scenarios

Tech Stack: Unity, C#, Firebase

EDUCATION

Bachelor of Science in Computer Science

Central Philippine University, Iloilo City, Philippines — 2021–2025
